DETAILED ACTION

Election/Restrictions

Applicant's election of Species I (Figures 1-3) in the reply filed on June 12, 2007 is acknowledged. Because Applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP §818.03(a)).

Accordingly, claims 1-4, 7 and 9 have been examined on the merits in this office action. Claims 5-6, 8 and 10-13 have been withdrawn from consideration.

Specification

The specification is objected to due to the lack of titles.

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT.
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC.
- (f) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).

Art Unit: 3733

- (I) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

Claims 1-4, 7 and 9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims do not clearly recite structural features of Applicants' invention in a readily understandable manner due to the use of reference numerals within parentheses. Reference numerals should not be used as a substitute for clear recitation of structural features. The Examiner suggests that the reference numerals be deleted to avoid confusion.

The following are examples of incomplete recitation of structural features of Applicants' invention.

In claims 2 and 4, the recitation of "a pressure screw" is confusing since it is unclear how the pressure screw recited in claim 4 is different from the pressure screw recited in claim 2.

In claim 7, "bottom of the opening (45)" lacks antecedent basis.

In claim 9, it is unclear what structure is being claimed by the limitation "cuttable smooth cylindrical profile."

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

As best understood in light of the rejections under 35 USC 112 second paragraph made above, claims 1-4, 7 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Martin et al. (US 5,368,594).

Martin et al. disclose a vertebral osteosynthesis device or rachidian anchoring device including: pedicular hooks 5a; a transverse rod 3 having a smooth cylindrical profile and capable of being cut; each hook 5a including an anchoring portion; a clip 12 to secure rod 3 in the open body of each hook 5a; each hook 5a having a prolongation 16 directed perpendicular to the direction of securement of rod 3 with the hook wherein the prolongation has a tapped bore 15 coacting with a pressure screw 14 (Figs. 2-3, col. 3, lines 15-68 and col. 4, lines 1-39).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
